Projects

Netflix Customer Churn Prediction | [GitHub](#)

Nov 2025 - Jan 2026

- Designed and deployed an end-to-end production-ready customer churn prediction pipeline integrating data ingestion, preprocessing, feature engineering, model training, and REST API inference services.
- Optimized a LightGBM classifier achieving **~95%** accuracy using stratified cross-validation, hyperparameter tuning, and feature importance interpretation for business-driven retention insights.
- Containerized the prediction service using Docker and deployed a Flask-based inference API with ngrok endpoint exposure enabling real-time churn risk evaluation through an interactive web interface.
- Improved prediction latency, inference scalability by modularizing pipeline components, separating preprocessing inference workflows.

Optimal Fertilizer Recommendation System | [GitHub](#)

Aug 2025 - Oct 2025

- Built an intelligent fertilizer recommendation engine using XGBoost classifier trained on **8+** agronomic and environmental parameters achieving **~92%** prediction accuracy.
- Applied categorical encoding, missing value handling, feature scaling, and correlation-based feature selection improving model robustness and interpretability.
- Developed and deployed an interactive Streamlit application enabling farmers to generate real-time fertilizer recommendations for precision agriculture decision support.
- Executed model validation pipeline using cross-validation, performance metrics ensuring generalization reliability on unseen dataset.

Electronic Review Sentiment Analysis using NLP Pipeline | [GitHub](#)

Aug 2025 - Oct 2025

- Scraped and processed **500+** Flipkart product reviews using BeautifulSoup and automated structured dataset generation pipelines.
- Built TF-IDF vectorized sentiment classification models achieving **~90%** accuracy through preprocessing, tokenization, stop-word removal, and polarity scoring.
- Designed an interactive Streamlit analytics dashboard visualizing sentiment distribution, keyword trends, and customer opinion clusters improving insight discovery efficiency by **~40%**.
- Automated text preprocessing workflow enabling scalable sentiment analysis for large e-commerce review datasets.

Training

Advance Python for ML & AI | CSE Pathshala | [Certificate](#)

Jul 2023

- Developed strong proficiency in Python through **10+** hands-on tasks and mini-projects, strengthening problem-solving skills and improving coding efficiency while applying core programming concepts to practical scenarios.
- Built and evaluated **3+** machine learning models using scikit-learn with up to **85%+** accuracy, applying feature engineering, cross-validation, performance metrics and foundational neural networks to real-world problem settings.

Certificates / Certifications

Introduction to Cloud Computing (IBM) Coursera Certificate	Sep 2025
Introduction to Machine Learning (IIT-Madras) Swayam- NPTEL Certificate	Apr 2025
Software Development Processes and Methodologies Coursera Certificate	May 2024
The Bits and Bytes of Computer Networking (Google) Coursera Certificate	Jan 2024

Skills

Languages:	Python, C, C++, Java, SQL, Java Script
Frameworks:	Django, Flask, Fast API, TensorFlow
Databases:	MySQL, PostgreSQL, MongoDB, SQLite
Tools:	Git, Docker, Linux, Power BI, Tableau, Excel
ML/AI:	Machine Learning, Deep Learning, NLP, Computer Vision
Concepts:	Data Structures, Algorithms, OS, DBMS, OOP, DevOps
Soft Skills:	Critical Thinking, Problem Solving, Curiosity, Adaptability

Education

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering (Hons) — CGPA: 8.83

2023 – 2027

Phagwara, Punjab

Narayana Junior College

Intermediate (PCM) — Percentage: 97.4

2021 – 2023

Nandyal, Andhra Pradesh

Sarvagna EM High School

Matriculation (PCMB) — Percentage: 98.3

2020 – 2021

Nandyal, Andhra Pradesh
